

# TWIN CHEMICALS, INC.

## Specifications: Stick-M-Up Concentrate Available in 4x1 Gallon Cases Only

Appearance:	Clear Liquid
Odor:	Mint and butyl
Boiling Point:	Not determined
Vapor Density:	> 1
pH:	12—13
Flash Point:	< 63 C
DOT Shipping Class:	55
Shipping Weight:	Case = 32 lbs.
Specific Gravity:	1.035 g/ml
Solubility:	Complete in water
Coverage Rate:	250 - 500 sq. ft. over carpet 400-1000 sq. ft over glue
% Volatile/volume:	87
HMS Rating:	2-2-0
Shelf Life:	2 years

DOT Shipping Name: UN1760, CORROSIVE LIQUID, N.O.S. (CONTAINS SODIUM METASILICATE & ETHANOLAMINE) 8, PGII  
 DOT Hazard Label: CORROSIVE

STICK-M-UP CONCENTRATE is a specially formulated carpet and carpet adhesive remover. STICK-M-UP CONCENTRATE allows for quick removal of glued down carpet and acrylic, latex and pressure sensitive adhesives from concrete, terrazzo, ceramic tile and other surfaces. It is designed to soften carpet adhesive so that carpet may be easily removed and to allow for easy scrape removal of the carpet adhesive. STICK-M-UP CONCENTRATE is water based, contains no petroleum distillates, has a low odor and low VOC.

Read and understand material safety data sheet when using this product.

**To Remove Adhesive From Substrate** (where floor covering has already been removed)  
 Dilute STICK-M-UP CONCENTRATE with 4 parts water, hot water is preferable and will speed up removal process. Spray, pour or mop solution onto the adhesive making sure to completely cover the area to be worked. The floor area should not be allowed to dry. Make sure that "high areas" in the working area are kept wet. Allow at least 20 minutes dwell time before beginning to work the areas. Use scrapers or propane strippers with Nylo-Grit brushes or similar equipment. Discard removed adhesive and then rinse the floor with clean water, mop and allow to dry.

**To Remove Glued Down Carpet**  
 Dilute STICK-M-UP CONCENTRATE with 4 parts water, hot water is preferable and will speed up removal process. Cut the carpet into workable sections approximately 2 feet wide. Spray, pour or mop solution onto the carpet making sure to completely cover the area to be worked. Use a carpet roller or squeegee to help spread the solution evenly. Allow the solution to dwell for at least 1 hour. If possible allow the solution to work overnight. If leaving the solution over night, cover the work area with plastic sheeting to prevent excessive evaporation. Pull up carpet sections by hand and immediately begin scrapping away residual adhesive. Once the residual adhesive is removed, rinse and mop with clean water and allow to dry.

**To Remove Sheet Vinyl**  
 Dilute STICK-M-UP CONCENTRATE with 4 parts water, hot water is preferable and will speed up removal process. Cut the sheet vinyl into workable sections approximately 2 feet wide. Pull up wear layer. Spray, pour or mop solution onto the sheet vinyl backing making sure to completely cover the area to be worked. Allow the solution to dwell for at least one hour. Do not allow the floor area to dry. Remove backing and adhesive with scraper. Once residual adhesive is removed, rinse and mop with clean water and allow to dry.
